NORTH-HOLLAND

SUBJECT INDEX OF VOLUME 77*

Coupled problems

Existence and location of eigenvalues for fluid–solid structures, C. Conca, J. Planchard and M. Vanninathan (3) 253–291

Dynamics

Buckling and vibration of finite-length composite prismatic plate structures with diaphragm ends, Part I: Finite strip formulation, D.J. Dawe and V. Peshkam (1–2) 1–30
Buckling and vibration of finite-length composite prismatic plate structures with diaphragm ends, Part II: Computer programs and buckling applications, V. Peshkam and D.J. Dawe (3) 227–252
Existence and location of eigenvalues for fluid–solid structures, C. Conca, J. Planchard and M. Vanninathan (3) 253–291

Elasticity

Sensitivity analysis of linear elastic systems using domain parameterization and a mixed mutual energy principle, D.G. Phelan and R.B. Haber (1–2) 31–59

Finite element and matrix methods

Toward a universal *h-p* adaptive finite element strategy, Part 1. Constrained approximation and data structure, L. Demkowicz, J.T. Oden, W. Rachowicz and O. Hardy (1–2) 79–112
Toward a universal *h-p* adaptive finite element strategy, Part 2. A posteriori error estimation, J.T. Oden, L. Demkowicz, W. Rachowicz and T.A. Westermann (1–2) 113–180
Toward a universal *h-p* adaptive finite element strategy, Part 3. Design of *h-p* meshes, W. Rachowicz, J.T. Oden and L. Demkowicz (1–2) 181–212
A two fluids stationary free boundary problem, J. Descloux, M. Flück and R. Frosio (3) 215–226
Analysis of concrete structures under thermal loading, R. de Borst and P.P.J.M. Peeters (3) 293–310

* The issue number is given in front of the page numbers.

Fluid mechanics

A two fluids stationary free boundary problem, J. Descloux, M. Flück and R. Frosio (3) 215 – 226

Incompressible and near incompressible media

A two fluids stationary free boundary problem, J. Descloux, M. Flück and R. Frosio (3) 215 – 226

Material physics

Analysis of concrete structures under thermal loading, R. de Borst and P.P.J.M. Peeters (3) 293 – 310

Numerical solution procedures

Toward a universal *h-p* adaptive finite element strategy, Part 1. Constrained approximation and data structure, L. Demkowicz, J.T. Oden, W. Rachowicz and O. Hardy (1 – 2) 79 – 112

Toward a universal *h-p* adaptive finite element strategy, Part 2. A posteriori error estimation, J.T. Oden, L. Demkowicz, W. Rachowicz and T.A. Westermann (1 – 2) 113 – 180

Toward a universal *h-p* adaptive finite element strategy, Part 3. Design of *h-p* meshes, W. Rachowicz, J.T. Oden and L. Demkowicz (1 – 2) 181 – 212

Optimisation and design of structures

Design sensitivity analysis for nonlinear thermal systems, D.A. Tortorelli, R.B. Haber and S.C.-Y. Lu (1 – 2) 61 – 77

Shells and plates

Buckling and vibration of finite-length composite prismatic plate structures with diaphragm ends, Part I: Finite strip formulation, D.J. Dawe and V. Peshkam (1 – 2) 1 – 30

Buckling and vibration of finite-length composite prismatic plate structures with diaphragm ends, Part II: Computer programs and buckling applications, V. Peshkam and D.J. Dawe (3) 227 – 252

Solutions of ordinary and partial differential equations

Toward a universal *h-p* adaptive finite element strategy, Part 1. Constrained approximation and data structure, L. Demkowicz, J.T. Oden, W. Rachowicz and O. Hardy (1–2) 79–112
Toward a universal *h-p* adaptive finite element strategy, Part 2. A posteriori error estimation, J.T. Oden, L. Demkowicz, W. Rachowicz and T.A. Westermann (1–2) 113–180
Toward a universal *h-p* adaptive finite element strategy, Part 3. Design of *h-p* meshes, W. Rachowicz, J.T. Oden and L. Demkowicz (1–2) 181–212

Stability in structural mechanics

Buckling and vibration of finite-length composite prismatic plate structures with diaphragm ends, Part I: Finite strip formulation, D.J. Dawe and V. Peshkam (1–2) 1–30
Buckling and vibration of finite-length composite prismatic plate structures with diaphragm ends, Part II: Computer programs and buckling applications, V. Peshkam and D.J. Dawe (1–2) 227–252

Structural mechanics

Analysis of concrete structures under thermal loading, R. de Borst and P.P.J.M. Peeters (3) 293–310

Systems of linear and nonlinear simultaneous equations

Sensitivity analysis of linear elastic systems using domain parameterization and a mixed mutual energy principle, D.G. Phelan and R.B. Haber (1–2) 31–59

Thermal effects and thermodynamics

Analysis of concrete structures under thermal loading, R. de Borst and P.P.J.M. Peeters (3) 293–310
